PROFILE

Highly motivated Master's student in Computer Engineering with a Bachelor's degree in Electronics and Computer Science and a strong passion for building scalable, real-world systems. I enjoy hands-on problem-solving and transforming innovative ideas into practical, user-focused solutions. My core interests include Artificial Intelligence, Machine Learning, and Software Development, with hands-on experience in Full-Stack Development using the MERN stack (MongoDB, Express.js, React, Node.js). I continuously explore emerging technologies and strengthen my expertise, while actively contributing to collaborative and open-source initiatives. I am eager to leverage my technical skills, adaptability, and drive to contribute effectively to a dynamic and growth-oriented team.

EDUCATION

- K. J. Somaiya College of Engineering** July 2025 – August 2027
MTech in Computer Engineering
- Shah and Anchor Kutchhi Engineering College, Mumbai** December 2021 – July 2024
B.E in Electronics and Computer Science (ECS)
Graduation mark: CGPI 8.30 (Distinction)

First grade achieved in modules including: Software Engineering & Software Testing, Web Technologies, Artificial Intelligence, Computer Networks, Management Information Systems, Natural Language Processing

- Maratha Mandir's Babasaheb Gawde Institute of Technology, Mumbai** August 2018 – August 2021
Diploma in Computer Technology
Graduation mark: 86.29% (Distinction)

First grade achieved in modules including: Software Engineering, Java Programming, Computer Networks, Microprocessors, Operating Systems, Software Testing, Programming With Python, Mobile Application Development.

- Army Public School, Mumbai** April 2007 – April 2017
Secondary School Certificate (CBSE)
Graduation mark: 77.90% (Distinction)
-

ADDITIONAL INFORMATION

Technical Skills: Python, MERN, Linux server administration, C, C++, HTML, CSS, Cloud Computing, AI/ML.

Languages: Marathi (Native), English (Fluent), Hindi (Fluent)

Activities:

- Summer 2022:** Mastered IoT hardware, software & apps at SAKEC's STP.
- July 2022:** Participated in Innovative India Coding Championship (Round 2) organized by Coding Ninjas (AICTE approved)
- Jan 2023:** Learned Linux server administration at STP.
- Final Year Project:** Built a data-driven Student Result Analysis System using Python.
- June 2024:** Participated in Cloud Computing and MERN at SAKEC's STP

Certificates:

Accenture North America Data Analytics and Visualization Job Simulation on Forage - August 2024

- Completed a simulation focused on advising a hypothetical social media client as a Data Analyst at Accenture
- Cleaned, modelled and analysed 7 datasets to uncover insights into content trends to inform strategic decisions

J.P. Morgan Software Engineering Virtual Experience on Forage - August 2024

- Set up a local dev environment by downloading the necessary files, tools and dependencies.
- Fixed broken files in the repository to make web application output correctly.
- Used JPMorgan Chase's open-source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.

Harvard's CS50 Introduction to Computer Science on EdX – September 2024

- Gained a comprehensive understanding of fundamental computer science concepts, including algorithms, data structures, software engineering, and problem-solving techniques.
- Developed proficiency in programming languages like C, Python, and SQL, with practical experience in using these languages
- Gained hands-on experience with web development technologies including HTML, CSS, and JavaScript, as well as understanding how web applications are structured and built.
- Completed a project that demonstrate practical application of concepts, that involves building a substantial software application from scratch.

Harvard's CS50 Introduction to Artificial Intelligence with Python on EdX – October 2024

- Gained a comprehensive understanding of fundamentals of artificial intelligence concepts, including the algorithms which are used to make the computer understand what the person wants.
- Developed proficiency in Python with practical based projects.
- Completed projects that demonstrate the practical use of the concepts which were taught in the course.

Harvard's CS50 Introduction to Databases with SQL on EdX – October 2024

- Gained a strong understanding of relational database design, normalization, and data modeling concepts.
- Developed proficiency in writing complex SQL queries, including joins, subqueries, aggregations, and indexing
- Completed hands-on projects involving database creation, optimization, and real-world data management scenarios.

CSI's (Computer Society of India) - Masters in Python Fundamentals – April 2025

- Developed a strong foundation in Python programming with a focus on Flask-based web development, including building dynamic web applications, handling routing, templates, and integrating backend logic with frontend interfaces.
 - Strengthened problem-solving skills through hands-on coding exercises and practical assignments.
 - Applied Python concepts to build functional programs, demonstrating real-world applications of the techniques learned in the course.
-
